Congress Two Months in Session and Nothing Done.

SENATE DEBATING REPEAL BILL

House Wasting Time on Partisan Legislation Over Repeal.

Wannessron, Oct, L-The ninth week of the present session of congress begins temocrow, and the result of the work so far accomplished cannot be said to be for accomplished cannot be said to be encouraging to persons who had hoped for a speedy adjustment of the great financial question, which caused the issue of the call for the special session. The present outlook is toward a contin-uation of the debate, which has been in progress for the last five weeks in the nate. The recewed talk of compromiss legislation, however, gives the impression in some quarters that the end may be near. The list of speakers has not been completed for this week, and it may be assumed that when it is the names of few repeal senators will appear upon it, and the subate will be left almost altogether to the silver men. Three of these. Teller, George and Morganare entitled to the floor at any time to conclude speeches which they have begun but not finished. Mr. Call of Florida has signified a desire to address the senate tomorrow, but his is the only new speech formally announced.

Partisan Legislation. The week's business in the house will be confined, so far as can be stated, to a continuance of the detate on the elec-tion bill, under the order which will exhaust itself on the loth inst. The debate, as far as it has progressed has failed to develop any of that intensity of partisan feeling so freely predicted of it, in fact, it has been rather tame and un-interesting, and on one or two days last proceed with the argument. An improvement in this respect is anticipated this week. The speaker's list contains the names of some of the leaders who have asked for time—Burrows, Henderson (Iowa), Dolliver, Fitch, Fellows and others. The expectation is that the de-bate, like that on the ball for the repeal

of the silver purchasing law, will increase of the silver purchasing law, will increase in interest toward the close and go out in a blaze of glory, so to speak.

There are a number of measures on the calendar which committees may exil up during the consideration morning hour, but it is not probable that any of them will be brought to the attention of the house for the time for discussion is too brief to warrant expectation of definite action. Mr. Richardson does not intend to press the printing bill until after the election debate has been
